

The Executive Director spoke to our Frost Bank Representative to discuss the security issues experienced by Frost customers. She was assured that as long as we haven't mailed any payments to specific P.O. Boxes in San Antonio we were not part of the security breach. The PIPOA does not mail any bills to San Antonio. The City Of Corpus Christi utilize several firms out of San Antonio for their billing division and a couple of the P.O. Boxes have been flagged as compromised. We will continue to monitor our Frost account as always as all of our accounts, along with our Frost Representative. The bank representative stated they would most likely see something suspicious before we would, and will notify us immediately.
